## Software Developer

- Sydney CBD
- Build the future
- Help change the way people work and engage together

---

### Position

As a developer with nsquared you will be responsible for creating, enhancing and testing software products. You will work closely with nsquared's development team to deliver monthly milestones that will ensure the growing success of the products and the company.

Your ability to deliver high quality code to deadlines will be critical to the success of the role.

---

### Description

nsquared opened its doors for business in the Sydney CBD in 2008. The company is self-funded and has grown each year of its operation. In 2015, nsquared is expanding again.

nsquared has always been the provider of advanced leading-edge software solutions. Since early 2009, its core business focus has been centred on creating exceptional software for gesture based computing experiences. In mid 2013, it shifted its focus to include the creation and delivery of digital table hardware as well as software. In early 2014 the design and development phase for delivery of the nsquared digitable product range commenced. One year in, there have been several products designed and delivered. In 2015, the company goal is to move that process forward.

As a member of the nsquared team you will have the opportunity to contribute and work with an inspired group of individuals on projects that are unparalleled in terms of their uniqueness in Australia, and indeed, most of the world. The team is inspired by the idea that they are working together to change the way people meet and work together now and in the future.

As a company that is moving into its next phase of growth, nsquared encourages personal growth and rewards action-oriented self-motivated people.
